Skills

JavaScript, HTML, CSS, ReactJS, Swift, and PostgreSQL

Education

DevMountain Bootcamp

January 2024 - April 2024, Web Development Course

- Gained a solid foundation in front-end development with ReactJS, CSS, HTML, and JavaScript
- Learned to use Redux for state management and integrating React components with backend data
- Developed backend capabilities including querying PostgreSQL databases with Sequelize and creating efficient RESTful data retrieval endpoints, showcasing a well-rounded understanding of full-stack development

Mountainland Technical College

August 2022 - May 2023, Mobile Development Certification

- Learned how to use XCode to develop mobile applications for iOS in UIKit and SwiftUI

Skyridge High School

Graduated May 2023, High Honors

Projects

Hidden Gems

[GitHub Link](#)

- Developed a social web application for discovering and sharing under-the-radar locations
- Allowed users post "Gems"—spots they find unique or hidden—complete with ratings on enjoyment and crowd level, powered by Google Maps and AWS-SDK for precise mapping and efficient image data handling
- Created a platform for connection, allowing users to follow others, personalize their profiles with images and custom themes, and navigate a community-curated world of lesser-known locales

Personal Games Project

[GitHub Link](#)

- Developed a website using ReactJS featuring a collection of interactive games accessible without the need to log in; however, creating an account enables users to save high scores
- Allowed authenticated users to also personalize their profiles, including username modifications
- Post-gameplay, if a logged-in user's score ranks within the top 20 for any game, it automatically becomes featured on that game's leaderboard

Golf Tournament App For UVU

Able to show upon request in an interview

- Collaborated closely with three peers from Mountainland Technical College to develop a scorekeeping application tailored for UVU's golf tournaments, utilizing SwiftUI for the design
- Leveraged Firebase for efficient data writing and reading capabilities, enhancing the app's functionality
- Employed terminal commands and GitHub for version control, adeptly managing merge conflicts and branch operations to maintain code integrity

Experience

Maverik

August 2023 - December 2023, Maverik Gas Stations

- Interacted with consumers at the BonFire grill to provide them an elevated store experience
- Prepared food for customers and prepared the store for daily operations with best practices in cleanliness
