

MOUNTAINLAND
TECHNICAL COLLEGE

To Whom it may concern,

I would like to recommend Michael Whiting as one who is exemplary and qualified to take on a software developer role. Michael took my Mobile Development Program here at Mountainland Technical College. It is a 9 month course that dives deep into the Swift programming language with its related UI frameworks of UIKit and SwiftUI. Throughout the program it was very prevalent that Michael is a talented programmer and picks up new concepts with ease. Michael consistently went above and beyond in his coursework showcasing his reliability and work ethic.

After the program I hired on Michael to help me build an app for Utah Valley University. Throughout the internship Michael showed great leadership skills as he worked with his team members. He took charge with his tasks and helped others with the tasks they were assigned. Anytime I gave Michael a task I knew with a surety that he would solve the problem with an elegant and easy to understand solution.

It is my understanding that Michael has continued his studies with a web development course. Overall, I would recommend Michael for any programming related job. I can guarantee that he will be a great asset to any business no matter that development need. If you have any questions please reach out to me at brayden.lemke@mtec.edu.

Sincerely,
Brayden Lemke
MTECH Mobile Development Program Coordinator
